

1. Explain the difference between capital expenditure and revenue expenditure. Provide one example of each.
Capital expenditure is for long-term assets; revenue expenditure is for operating expenses.
2. Describe the key steps in the GST input tax credit claim process for a registered business.
Claim requires an invoice, eligible purchase, filing the GST return, and keeping records.
3. Calculate depreciation for machinery purchased for \$120,000 on 1 April using the straight-line method.
 $\text{Depreciation} = 120,000 \times 10\% = 12,000$.
